Wildlife of Ohio
Grades pre-K to adult
Teacher’s Guide

Description
This traditional animal program includes a classroom session featuring up-close encounters with local Ohio wildlife. A walk in the Wildlife Gardens will also highlight the many resident Ohio animals that are on exhibit at Lake Erie Nature & Science Center. **Content is tailored to the age level participating in the program and may vary with the availability of Center animals.**

**Length:** 60 minutes. **Adult chaperones recommended:** 1

Pre-Trip Activities

- Use webcams to view animals in their natural habitat or simulated environments to observe and record physical characteristics of the animals as well as behavioral traits that are taught from parent to offspring. Falcon cams and bat cams are used by the Ohio Department of Natural Resources and can be used for this study.
Post-Trip Activities at School

- Explore organisms that once lived in Ohio and no longer exist. National Geographic provides an article on the find of a giant cockroach fossil in Ohio. Science Daily provides a rich source of information on the relationship between mammoths and elephants.

Extension Activities

- Investigate various species that have been endangered due to environmental changes and examine efforts to reestablish and support their populations. One example is the trumpeter swan. The Ohio History Central provides details of this bird’s story.
- Research and present on a native Ohio animal. Use ODNR-Division of Wildlife’s A to Z Species Guide to find photos, information, diet, tracks and sounds of a the chosen Ohio wild animals.
