Program Overview

Description

Model the daily motion of the sun and stars in this active planetarium program. Students will explore daily changes in the day sky and night sky as well as seasonal changes. Complete your program with a brief discussion on moon phases and a look at the current night sky.

Adult chaperones recommended: 2

Books we recommend

Post-Trip Activities

Experiment with shadows from the sun. Questions to explore include: What happens to a shadow throughout the day? Can the length of a shadow be measured? How does the shape of the shadow change? Can shadows be made inside? Use light bulbs, overhead projectors, virtual investigations or combinations of the above to explore inside shadows.
